### STATEMENT OF WATER DIVERSION AND USE S010445 FOR A DIVERSION FROM THE ANDERSON CREEK WATERSHED IN LAKE COUNTY

On February 14, 2008, the State Water Resources Control Board, Division of Water Rights (Division) received from the Anderson Springs Community Service District (District), a report of annual water usage for 26 riparian users. On February 19, 2007, Mrs. Medrano with the District explained to Division staff that water is supplied to the 26 parties are under an agreement with the District. Based on the conversation, the Division understanding is that none of the 26 has their own active diversion system on Anderson Creek.

Division staff determined that out of the 26 parties listed; only five Statements of Water Diversion and Use are on record with this office. Your claim of a water diversion and use to Anderson Creek is filed under S010445. Since it is understood that your source of water is supplied from the District under their water rights rather you actually pumping the water from the creek, S010445 will be classified "inactive" in the Division's database. Until such time when you notify the Division that you have installed your own diversion works and are actively pumping for a beneficial use, the supplemental reports of water usage for S010445 will not be sent out.

If you have questions or concerns regarding this matter, please contact me at (916) 341-5408 or [wtoy@waterboards.ca.gov](mailto:wtoy@waterboards.ca.gov).

Sincerely,

### GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same water shed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by a riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

- "Statements of Water Diversion and Use"
- "Information Pertaining to Water Rights in California"
- "Water Rights for Stockponds Constructed Prior to 1969"
- "Appropriation of Water in California"
